

GME Security has been the expert partner in integrated fire protection and electronic security solutions for organisations across Ireland, spanning industry sectors from education and healthcare to commercial enterprises and public facilities. Their work is discreet, often unnoticed, but its impact on protecting working environments and the people in them is evident every day.

Excellence in Fire  
and Security Solutions  
Security Design and Maintenance

## GME SECURITY

The company offers a broad portfolio of safety and security services, including access control and intrusion detection, CCTV and security integration, fire detection and suppression, emergency lighting, and ongoing maintenance and inspection. In addition, their 24-hour emergency security and fire response and alarm monitoring give clients full confidence that their buildings are protected around the clock.

With a reputation cemented in over three decades of expertise and reliability, GME Security's recent award of Business All-Star status for 2026 by the All-Ireland Business Foundation reflects the high level of performance, trust and customer focus that the company exhibits each and every day.

GME Security's expertise and unparalleled levels of service are evidenced by the solid array of Quality Standards, Licencing and Accreditation the company has gained. In addition to being fully licenced by The Private Security Authority for the installation and maintenance of electronic security systems, GME Security is certified to ISO 9001:2015 for its rigorous internal Quality Management System (QMS). In addition to its systems being engineered to Irish Standard

(IS) EN specifications as a Certified Intruder Alarm Installer (IS EN 50131), Approved Access Control Installer (PSA 67:2021) and Certified CCTV Installer (PSA 2006\_12), every engineer is Garda Vetted and holds a valid SOLAS Safe Pass for construction site work, and is MEWP/Working at Heights certified for operating cherry pickers and scissor lifts for high-level camera installations.

What sets GME Security apart is its integrated approach. The company designs and delivers coordinated systems that safeguard people, property, and essential assets whilst supporting, not hindering, day-to-day business operations. It does not treat fire protection and electronic security as siloed disciplines. Its seamless, fuss-free approach to fire and security solutions is particularly attractive to public-sector clients, who often operate environments where vulnerable users must be protected without disrupting essential services.

GME Security has extensive experience delivering solutions tailored to the operational and regulatory requirements of healthcare facilities, educational campuses, hospitality venues, large commercial properties, and retail environments. This

can mean ensuring strict compliance with fire safety regulations in high-footfall environments, protecting sensitive medical equipment or managing access to busy spaces such as campuses.

At the core of the company's ethos is a steadfast focus on customer needs and success, backed by robust technical expertise and an unwavering commitment to top-class workmanship at every level. The winning combination of experienced personnel and cutting-edge, proven technologies enables GME Security to deliver compliant solutions that are practical and provide total peace of mind to facility procurers and users.

For public sector organisations seeking to balance compliance, resilience, and accessibility, GME Security plays a vital role in creating secure, expertly managed environments. After three decades in operation, GME Security looks ahead to a future where it continues to prove that dependable protection is built on attention to detail, experience and complete understanding of the client's needs.
